

The Federal Communications Commission

Dear The Federal Communications Commission,

Doesn't the government ever work for WE - THE PEOPLE anymore? I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund - a ridiculous overcharge to begin with. I am concerned that this proposal could make my current service unaffordable. The price is already too high as is, thanks to everyone wanting to get their cut, and all of these charges on top of gasoline taxes, state taxes and income tax.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. The ones who can afford to pay - and who make the money from using the services. This is unfair!

I use my wireless phone for safety, security and convenience. When will you do something for the benefit of the overtaxed? I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Warren Mullin
